VAISEF OUTCOMES PROJECT INSTRUCTIONS
For 2022-2023 Exits

Hello VAISEF Members,
VAISEF values quality service provision, and as such, tracks member school success rates through the annual collection and reporting of outcome data. Entrance and exit data is collected by each member school and then reported as both individually, per each private day and residential special education member school, and aggregated data. Data collected is analyzed to address questions such as the average amount of time spent in the program, the number of students served, discharge patterns (e.g. the number of positive, planned discharges to a lower level of care) and many others. We use this information to identify trends in service provision and document continued and increasing service needs. **We are now collecting the exit data from 9/1/22 through 8/31/23.**

Some schools have already submitted their data, thank you.
For those who haven't, here are the links below, as well as training videos for those who have not entered the data previously. As a reminder, this is required of all members as documented in the Standards of Accreditation.

ALL members: Please complete the contact information form so we have up to date information in case we need to follow up.

Handy Dandy VAISEF Student Outcomes Survey Handbook This resource has directions for completing the surveys as well as screenshots and troubleshooting tips.
VAISEF Outcomes Data Project Webpage This is the link to the Outcomes Data Project section of the VAISEF website. It has links to each survey. **Please note: The most current Handbook is linked above.** The one on the website does not have current contacts for help.
